

FIKE CLEAN AGENT

FIRE SUPPRESSION SYSTEM

CAN YOU AFFORD DOWN TIME?

Fike[®]
CORPORATION

It's time to **think the unthinkable...**

Imagine your company's valuable data, equipment and systems lost to fire. It happens every day somewhere in the world. And it's devastating. Even one day lost to fire-related downtime can mean lost revenues, customers and profits.

You can't afford equipment being inoperable ... service interruptions to customers ... or being unable to produce valuable data, documents and resources. You must protect yourself, your business and most importantly, your customers.

Consider the Fike Clean Agent Fire Suppression system.

DO YOU REALLY NEED THIS MUCH PROTECTION

- 1 Would your equipment be damaged or inoperable if hit by water or dry chemicals?
- 2 Is your equipment and service easily replaced?
- 3 Do people occupy your facility?
- 4 Can your facility – and customers – tolerate business interruptions and downtime?
- 5 Do you want fire protection that requires minimal floor space and offers long-term availability?

If you answered "yes" to even one of these questions, consider Fike. Our Clean Agent system can minimize damages by quickly sensing and extinguishing a fire. Minimal damage equals minimal downtime.

Why HFC-227ea?

	HFC-227ea	INERT GAS	WATER SYSTEMS
TIME →	10 SEC	60 SEC	?
DAMAGE →	NONE	NONE	MAJOR
FLOOR SPACE →	1 CONTAINER	30+CONTAINERS	N/A
ROOM VENTING →	NO	YES	NO
OXYGEN REDUCTION →	NONE	YES	NONE
DOWNTIME →	NONE	NONE	MAJOR

For speed in suppressing fires, reducing damages, saving on floor space and allowing visibility, Fike is the clear choice.

THE BEST FIRE SUPPRESSION SYSTEM ON THE MARKET

HFC-227ea extinguishes a fire quickly by discharging in 10 seconds – or less! The system removes heat and breaks up the fire at the molecular level. HFC-227ea discharges as gas, leaves no residue and doesn't require costly clean-up, unlike sprinklers and other systems.

And with Fike's patented rupture-valve system, we offer greater coverage – faster and more effectively – than any other option. This means minimal damages and interruptions for your business.

HFC-227ea is the world's most widely accepted replacement for Halon 1301. HFC-227ea is people-friendly ... won't obscure vision in a fire ... and takes up less floor space than other systems. In addition, the U.S. Environmental Protection Agency named it a non-ozone depleting agent for fire extinguishing systems installed in occupied spaces.

HFC-227ea APPLICATIONS

- Telecommunications facilities
- Control rooms
- Computer rooms
- Data processing equipment
- Marine shipboard systems
- Record and archive storage
- Museums
- Universities
- Pharmaceutical and medical facilities
- Industrial applications

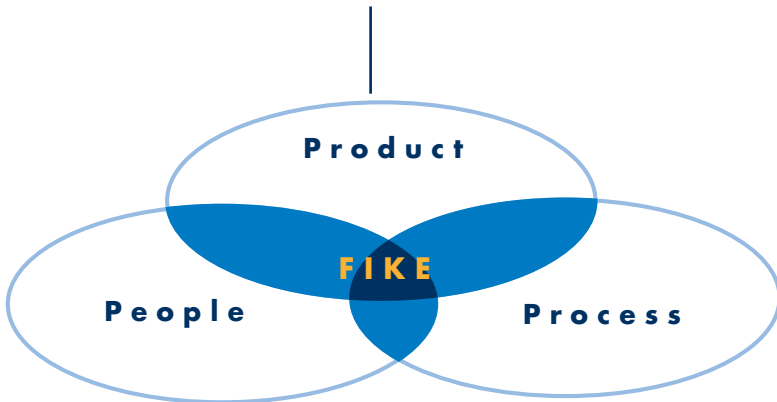

Why Fike?

Fike – The first choice of companies around the world. Since 1945.

THE FIKE DIFFERENCE

Fike is the industry standard for performance... unsurpassed for detection technology... and our rupture valve unleashes your protection the fastest.

We have more Clean Agent experience than any other company. Your distributor is a trained expert in Clean Agent Suppression Systems – and can handle all your needs quickly and efficiently.

We manufacture the finest products possible, your orders are filled quickly and you get 24-hour technical support. Our on-site manufacturing and testing guarantees you the highest quality protection.

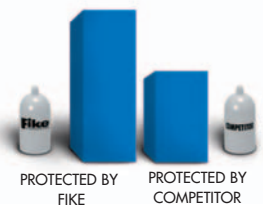

You can't afford a major – or even minor – interruption due to fire. In fire situations, every second counts. In fact, down time often outweighs the loss of equipment and structures. For this reason, companies large and small count on Fike.

We are the only fire suppression company that manufactures our own systems. As a result, you'll benefit from higher quality control in both equipment and personnel ... a greater capacity to meet your demands quickly ... and shorter lead times between your order and the system's installation.

Innovation is another key. At Fike, we built our name on research, development and testing of systems. "Good enough" is never good enough. We were the first company to offer an independent laboratory approved HFC-227ea system.

Fike's system offers the industry's largest containers – a full 1,002 pounds.

So you get far greater coverage and protection, while using less floor space. See how the protection of Fike's largest container measures up to the competition's largest container.

Fike leads the way ...

ADVANCED DETECTION SYSTEMS

You'll benefit from a wide variety of reliable detection and controls from single-zone to analog addressable systems. Our Cheetah Control Panel provides a direct link to the Vesda LaserPlus air sampling smoke detection system. You're given a full dialogue between the systems, alerting you to the exact problem – and its proper solution.

PERFORMANCE

Fike manufactures all the critical components that make up a Clean Agent system. We offer on-site research and testing of every system and piece of equipment. For these reasons, Fike is second to none on performance.

CLEAN AGENT

HFC-227ea is the top choice for Clean Agent Suppression Systems. Our system offers larger tanks for greater coverage and a patented rupture valve for quick release.

PEOPLE

Fike distributors are experts in the design and installation of Clean Agent Systems. Your distributor is trained to partner with you...to develop the best system for your specific needs.

TESTING

Fike pioneered the development of Clean Agent Systems. You'll benefit from our on-site facility dedicated to the relentless testing and enhancement of fire-protection systems.

FLEXIBILITY

Fike cylinders can store 8 to 1,002 pounds of Clean Agent. By offering more coverage in less space, you gain greater flexibility than you can with any other system.

PRODUCT SUPPORT

We support our products before – and after – the sale, offering 24-hour technical support.

MAKE THE RIGHT CALL.

If fire protection is of critical importance to your business, considering a Fike system is a smart decision. Why not give us a call? There's no obligation. If you have questions or would like an on-site analysis, call (816) 229-3405 or visit us on the web at www.fike.com. If you'd like to ask us questions via email, contact us at fpssales@fike.com

Other Fike products and services of possible interest: "Total Concept Explosion Protection", including explosion testing, explosion venting, explosion isolation, and explosion suppression systems to mitigate the effects of industrial explosions.
